

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claims 1 to 10. (Canceled).

11. (New) A navigational device for guiding a vehicle within a network of traffic routes, comprising:

- a processing unit for calculating a travel route to a destination; and
- a display for displaying a guide object, a movement of the guide object along the calculated travel route being displayed in relation to a traffic route, whereby the movement of the guide object represents driving maneuvers to be performed by a driver of the vehicle to reach the destination.

12. (New) The navigational device of claim 11, wherein the guide object includes a vehicle image.

13. (New) The navigational device of claim 11, wherein the guide object is displayed at a selected distance in front of a current position of the vehicle on the travel route in relation to the traffic route.

14. (New) The navigational device of claim 11, wherein the display is configured to superimpose the guide object on the traffic route, within a field of view of a driver of the vehicle.

15. (New) The navigational device of claim 11, further comprising:
an arrangement for representing on the display an area surrounding the traffic route.

16. (New) The navigational device of claim 11, further comprising:
an arrangement for determining a traffic situation in front of the vehicle; and
an arrangement for adaptively controlling the movement of the guide object depending on the traffic situation.

17. (New) The navigational device of claim 16, wherein the arrangement for determining the traffic situation senses other vehicles in an area surrounding the guided vehicle to determine the traffic situation.

18. (New) The navigational device of claim 16, further comprising:
an arrangement for ascertaining a highest permissible speed, wherein the ascertained highest permissible speed is used for determining the traffic situation.

19. (New) The navigational device of claim 11, wherein the guide object includes a display area for displaying at least one of directional displays and warning displays associated with a driving maneuver to be performed.

20. (New) The navigational device of claim 11, further comprising:

an arrangement for acoustically outputting driving instructions associated with the guide object.
